St. Louis, Mo., January 30, 1873.

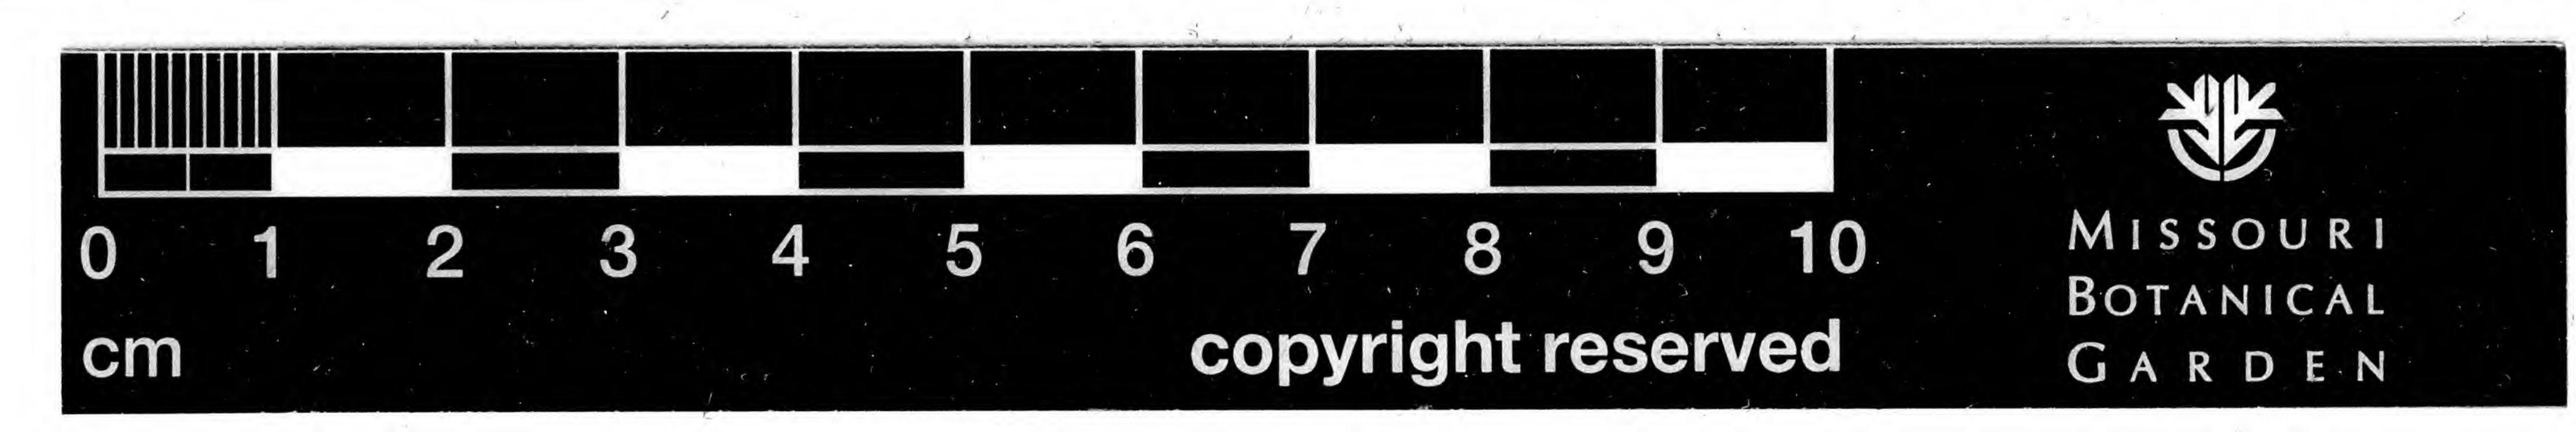

The undersigned takes great pleasure in recommending to the trade in general, and his former patrons in particular, the CHEMICALS AND MEDICAL PREPARATIONS of LARKIN & SCHEFFER, his successors in the Chemical Laboratory, 209 Myrtle Street, St. Louis.

MR. Scheffer has been in his employ, as the *Chemist* of the establishment, since 1864, and if the quality and purity of the goods manufactured by the undersigned have gained some reputation, it is to a great extent due to the skillful experience and untiring zeal of the chemist.

The undersigned is not only confident, but he *knows*, that the new firm continues to manufacture their preparations according to the principles formerly established by him, and is convinced that druggists and physicians will find it to their advantage to use the goods manufactured by LARKIN & SCHEFFER, in preference to any other now offered in the market.

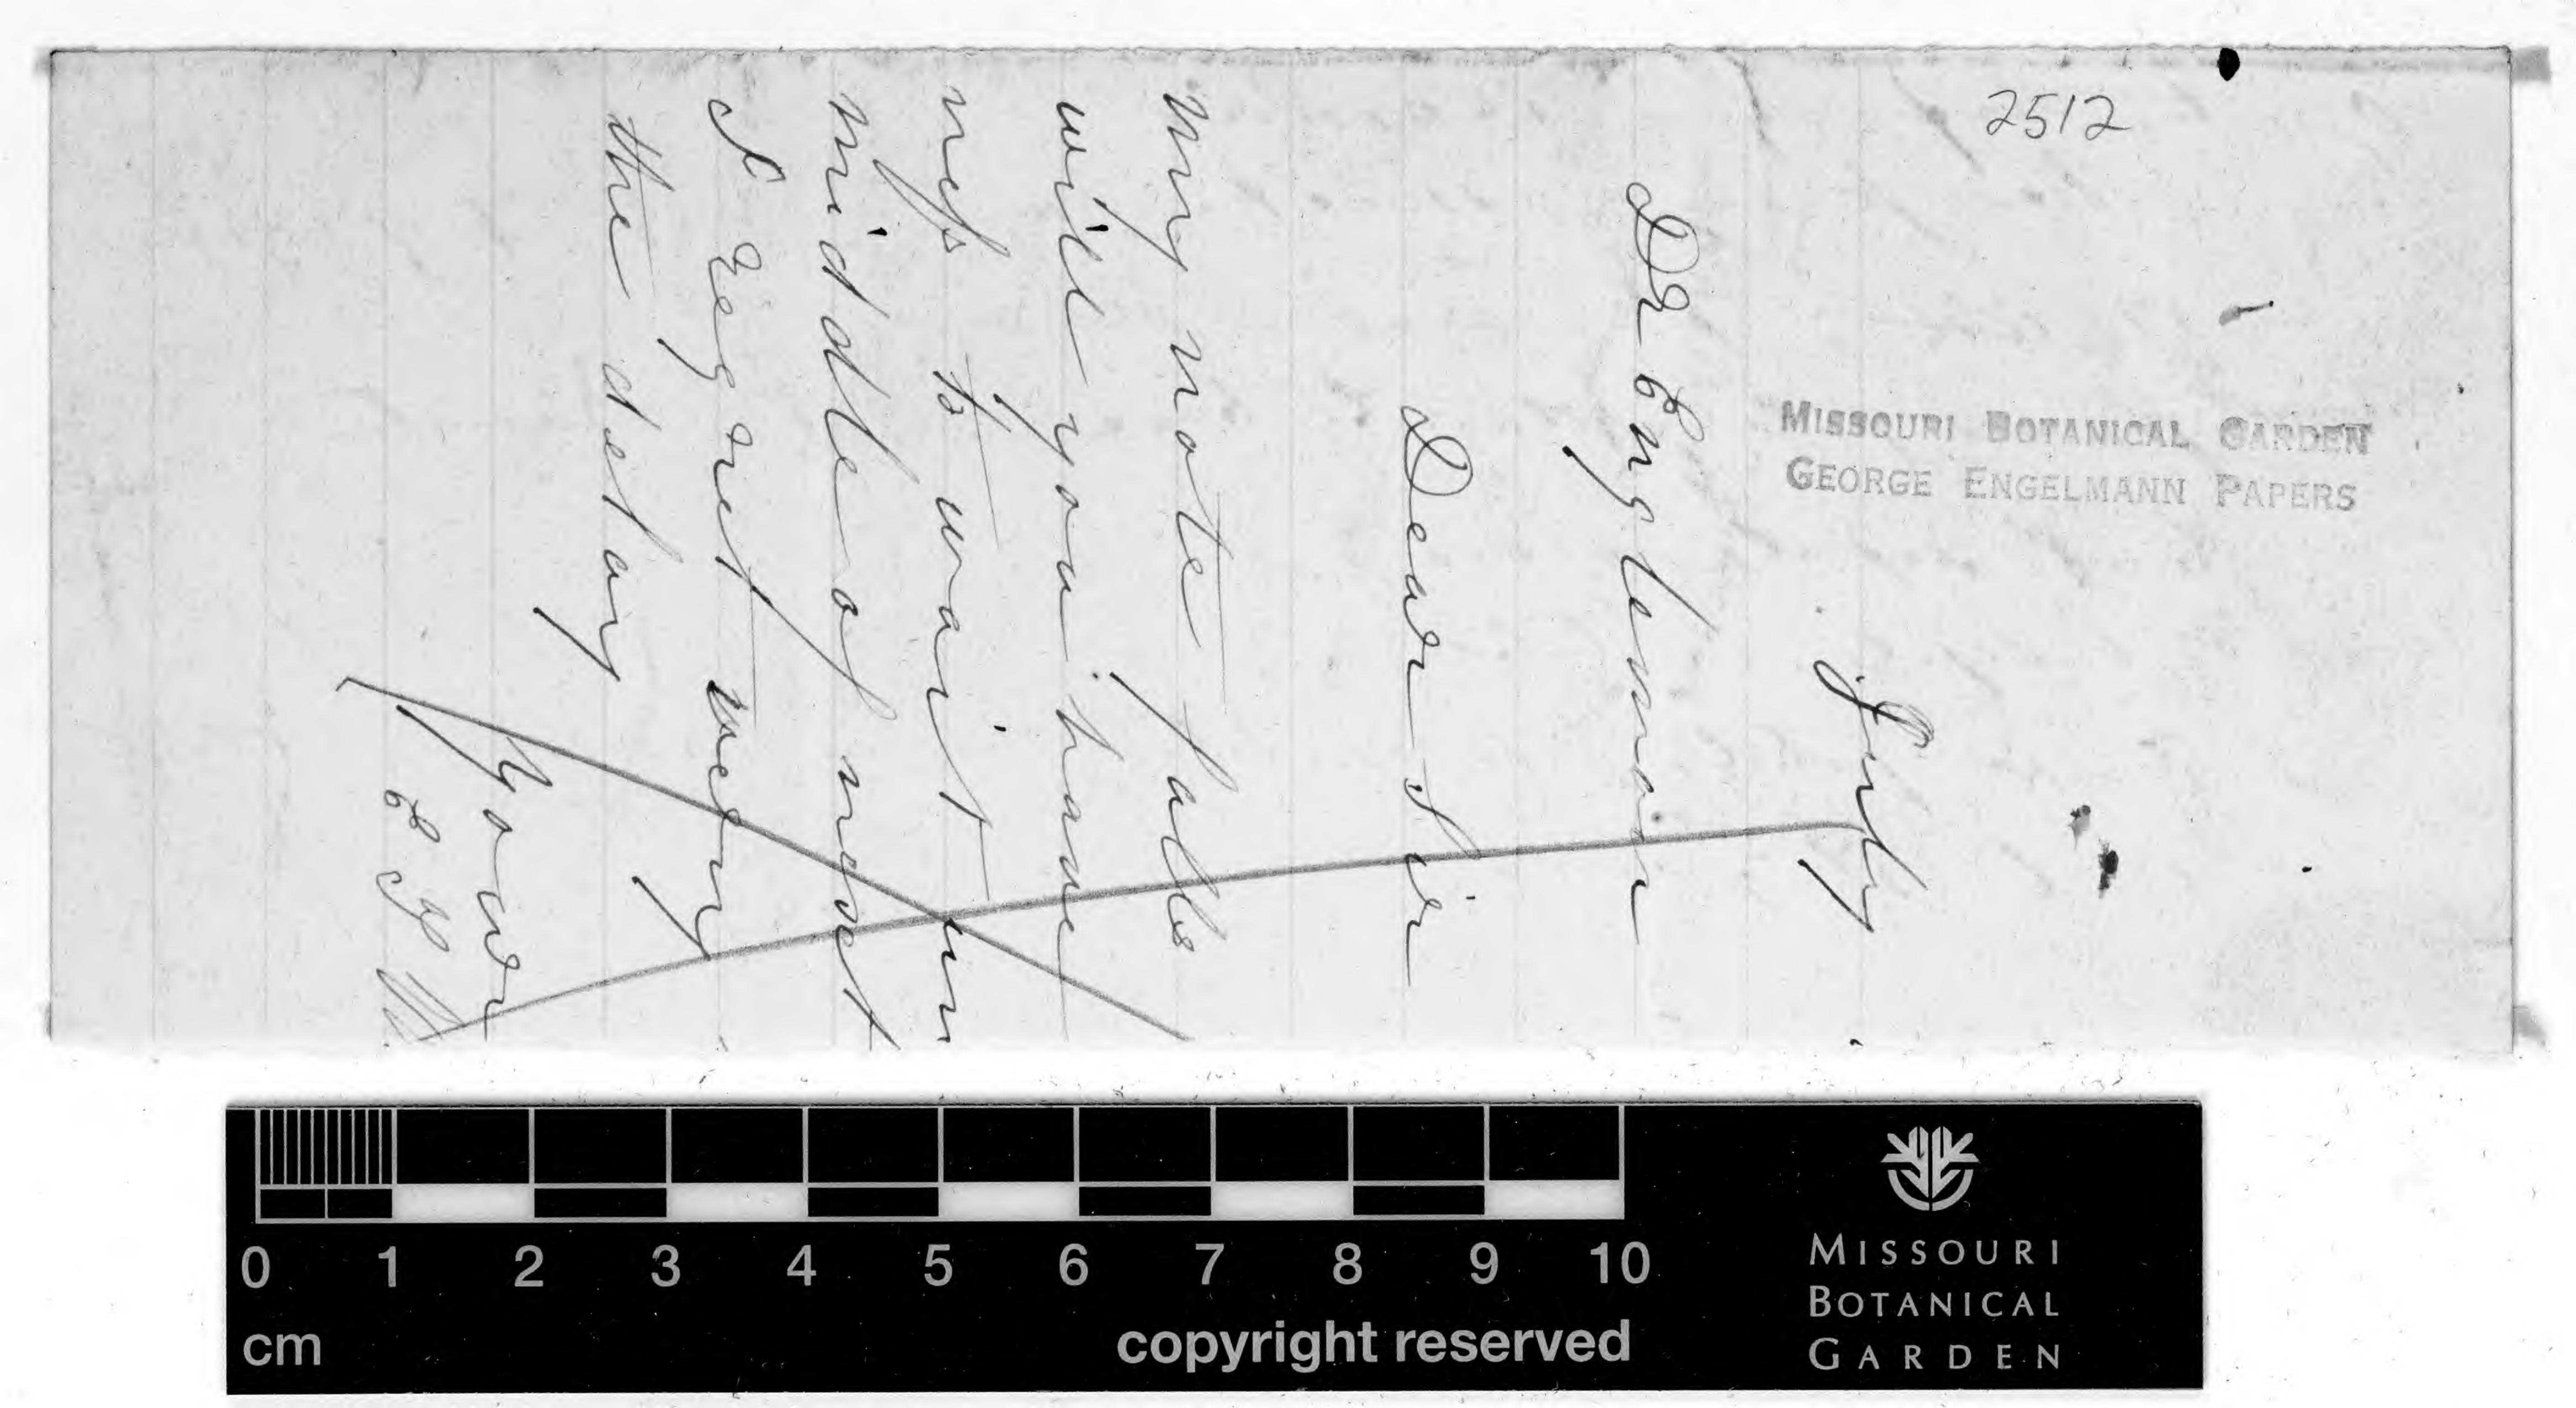

ENNO SANDER.
